

SECURITY AUDIT OFFER

Know your risks before they find you.

A practical security audit for small and medium businesses — attack surface, identity gaps, backup readiness, and a prioritised fix list. Built for Pacific operators who can't afford downtime.

SMB FRIENDLY · CLEAR NEXT STEPS · NO SALES SCRIPT

01 · Shielding

Perimeter, endpoints, and identity boundaries reviewed against real-world threat paths.

02 · Detection

Visibility gaps called out — logging, alerts, and monitoring that actually get used.

03 · Recovery

Backup and disaster-recovery reality check: can you restore when it matters?

04 · Roadmap

A ranked remediation plan your team can act on — sized for SMB budgets and capacity.

Request a Security Audit. We'll respond in one business day.
